17. Considering both the limitations and possibilities of the subject matter and course, how would you rate the overall teaching effectiveness of the instructor?

Comment Area

1. I really enjoyed Dr.Liu's lecture, it is very interesting, informative and related to common life. I have learnt a lot
2. He is very well prepared and makes the class really interesting.
3. Powerpoint slides clearly outlined information and made it easier to study, good choice of course content that constantly reinforced information and tied previously learned things to new material
4. I would highly recommend any of Dr. Liu's courses to any student. His lectures are interesting and thoroughly presented. He has a desire for students to not only learn the material, but have an appreciation for Biochemistry. His passion for teaching really shines through his lectures. I very much enjoyed his class!

17. Considering both the limitations and possibilities of the subject matter and course, how would you rate the overall teaching effectiveness of the instructor?

Comment Area

1. Dr. Liu is a good professor who always wants students to learn something out of his course. the only bad thing was, he needs to teach the whole course instead of asking for help from other professors.
2. Dr. Lui was great at focusing on the vital information of the material covered and not placing too much emphasis on the smaller details that were some what important but not necessary for understanding the big picture. I look forward to his 'metals in biology' course in spring 2012.
3. Very enjoyable class. I would take Biochemistry III if there were such a course! Dr. Liu is an excellent teacher. I look forward to his class next spring!
4. He was an instructor who was enthusiastic about teaching the subject. He was concerned about his students and tried his best to motivate the students to learn.
5. Thank you Dr. Liu and Dr. Yang for such a wonderful class. I really enjoy all of your classes. You did wonderful all semester and it really made all the materials easier to learn.
